## Message of the Organising Committee

In July 2022, it will be exactly 20 years since the first International Symposium on Bioorganometallic Chemistry was held in Paris, at the initiative of the two founding fathers of the discipline, Pr. Richard Fish and Pr. Gérard Jaouen. This memorable event was followed by several successful symposia all over the world, thanks to the proficient action of the advisory board of ISBOMC.

Since 2002, the community of bioorganometallic chemists has expanded significantly and the number of articles increased from 107 to 988 to date (source WOS, Nov 21) which testifies for the vitality of this research area worldwide.

We would like to celebrate the 20th anniversary of ISBOMC'02 in the form of a one-day colloquium gathering key members of the community of bioorganometallic chemists. The scientific programme was built up with a double idea in mind. **Plenary lectures** will be given by renowned representatives of the discipline and **keynote lectures** by talented younger colleagues. Some of them attended ISBOMC'02 in Paris. In addition to the conferences, young researchers will be able to exhibit their work during on-site and on-line **poster sessions**.

We sincerely hope you enjoy the scientific and social programmes and your short stay in Paris.

Bogna Rudolf & Michèle Salmain

## Confirmed Speakers

### Plenary lectures

**Christian Hartinger**, University of Auckland, New Zealand

**Anne Vessières**, Sorbonne Université, Paris, France

**Roger Alberto**, University of Zurich, Switzerland

**Eric Meggers**, Philipps Universität, Marburg, Germany

### Keynote lectures

**Ingo Ott**, Tech. Universität Braunschweig, Germany

**Konrad Kowalski**, University of Lodz, Poland

**Amanda G. Jarvis**, University of Edinburgh, UK

**Gilles Gasser**, PSL Research University, Paris, France

**Angela Casini**, Technical University of Munich, Germany

**Damian Plažuk**, University of Lodz, Poland

### Social programme

Wine and cheese party
